The Alpha Roofing Difference!

A storm has rolled through. Your property has been damaged by hail or wind. You've called your insurance company to come assess the damages. The claims process has begun!

The next step is key. How do you find a professional contractor who stands behind his work and will restore your property and investment to its original condition?

"Satellite imaging technology provides accurate measurements"

The Alpha Roofing Difference

We are NOT your typical roofer. All of our field and office representatives are former staff adjusters with some of the largest and most reputable insurance carriers. As former insurance adjusters, we have the experience necessary to help you navigate through your property claim in order to maximize your benefits and minimize your out of pocket expense, all while ensuring everything is done in the most ethical and proper way.

Typically, the first question a prospective client asks us is...

*"What's the LOWEST price you can do this work for?
Can you give me an estimate?"*

The answer is simple...You already have our estimate.
It is the SAME as your Insurance Carrier's estimate.

We do estimates the right way.

To create our estimates, we use Xactimate®, the EXACT same software that your Insurance Carrier uses to determine the fair market value for your repairs. The pricing is computed based on your geographic area and adjusted on a monthly basis to give the most accurate value. This is the ONLY proper way to ensure that you are receiving the best quality of workmanship and materials for your project.

Our goal is to provide you with exceptional service.

You get what you pay for.

Other contractors who don't use this software but instead give "rock bottom" estimates to obtain your business are actually selling you a product that is under Fair Market Value. Simply put, it is very likely that you are getting SUBPAR workmanship or INFERIOR materials for that bargain price.

A stress-free experience.

Going through the claims process can be stressful, but it doesn't have to be. By utilizing the same estimating software and employing some of the best former insurance adjusters to work on your behalf, we

are able to speak the same language as your Insurance Carrier, making your claim a seamless and positive experience. By choosing Alpha Roofing, you are hiring an award-winning, reputable, and professional contractor who will maximize your benefits, ensure the very best workmanship and quality of materials, and minimize your out-of-pocket expense.

Insurance companies caution that the lowest bidder is not the one you should hire to do your work for obvious reasons. Instead, choose the contractor that you feel most comfortable with to get the job done right, at a fair price, and that will stand behind their work!

That's what we offer.

That's the Alpha Roofing Difference!
